

## EVALUATION, REMEDIATION AND RECONSTRUCTION

You may know the name of Metro Testing Laboratories Ltd. In association with testing of concrete, soil, asphalt or perhaps geotechnical and materials engineering, however in 2006 Metro Testing Laboratories Ltd. ventured into speciality construction work under the banner of:

### **Metro Engineering & Concrete Restoration Services (METRO).**

Our clients have found good value in giving their concrete restoration projects to **METRO**. They know that we provide innovative, cost effective repairs carried out to the highest industry standards.

Our team has over 75 years of experience in the construction industry and have developed a reputation for creative innovation in solving their customer's problems.

Metro's crew of skilled concrete repair technicians can be called upon to successfully complete the most challenging concrete restoration tasks, even in environmentally sensitive areas.

*(Bowen Island Project before)*

*(Bowen Island Project after repair)*

In many cases our clients have required their structures remain in service during the repair process, and we have been able to accommodate this.

We have a good inventory of well maintained equipment for all of the work that we undertake. This allows our crews to mobilize in a very timely manner to serve customers with more urgent repair issues.

You may be wondering how 'Engineering and Restoration' can work together within the same company?

Normally, an engineering company is called upon to assess deterioration, prepare a report and project specifications, and review the repair. **METRO** approach is to have our engineers carry out an assessment of damage or deterioration, and advise the construction team of the requirements for repair. Then **METRO** construction team discusses the optimal approach to achieve the desired results, prepares a budget or quotation, and a repair is put into motion.

During the course of the repair, periodic field reviews are carried out by Metro's engineers who sign off at completion. Thereby saving money by getting cost effective, engineered repairs without redundancy or delays.

-Servicing British Columbia's Construction Industry Since 1987-

## Metro Concrete Restoration Services can provide:

- Evaluation
- Specification of repair procedures
- Reliable budget estimates
- Repair supervision and review
- Budget monitoring
- Engineering signoff on completion

## These are the kinds of areas and projects on which we can perform concrete restoration and repairs:

- Interior and Exterior concrete
- Concrete structures (inclusive of walls, columns, suspended slab, slab on grade, beams, stairs, foundations, planters)
- Underground structures (for water, electrical and sewage)
- Cracked and damaged concrete
- Parkades
- Dams (inclusive of underwater repairs)
- Docks (inclusive of underwater repairs)
- Marine Structures (inclusive of underwater repairs and "on the water" repairs)
- Bridges and Bridge Ramps
- Ferry Terminals
- Rail Terminals
- Grain Terminals
- Storage Silos
- Heritage Buildings

*Please call us for more information on how we might provide these services for you.*
